

New Product

Announcing the first 6 and 12 position Remote Antenna Switches which DO NOT require any control cables. In the past, remote antenna switches greater than 4 position required an extra 4, 6 or 8 conductor cable which had to be run from the shack up to the remote antenna switch. The Models GR-6 and GR-12 Remote Antenna Switches use a unique (patent pending) approach which allows the RF signals, power, and control signals to be multiplexed along a standard coaxial cable.

FEATURES

- * OPERATES 160 THRU 6 METERS AT FULL LEGAL POWER
- * SWITCHING RELAYS ARE UL LISTED FOR 250 VOLT, 10 AMP CONTINUOUS DUTY OPERATION
- * WATERTITE EXTERNAL SWITCH WITH STAINLESS STEEL COVER FOR ALL WEATHER CONDITIONS.
